

Creating a Tree Map Chart

Montana Data Portal

How do I create a Tree Map Chart?

To create a chart, select a filtered view or dataset

Select the Visualize button in the upper right hand corner of a view or dataset.

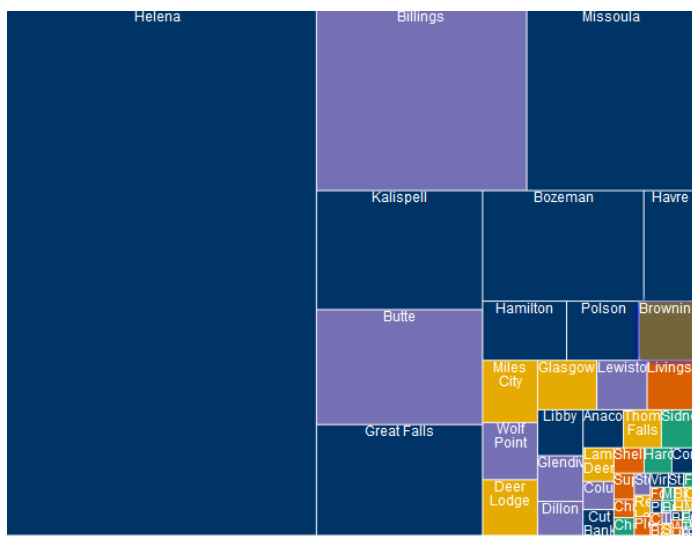

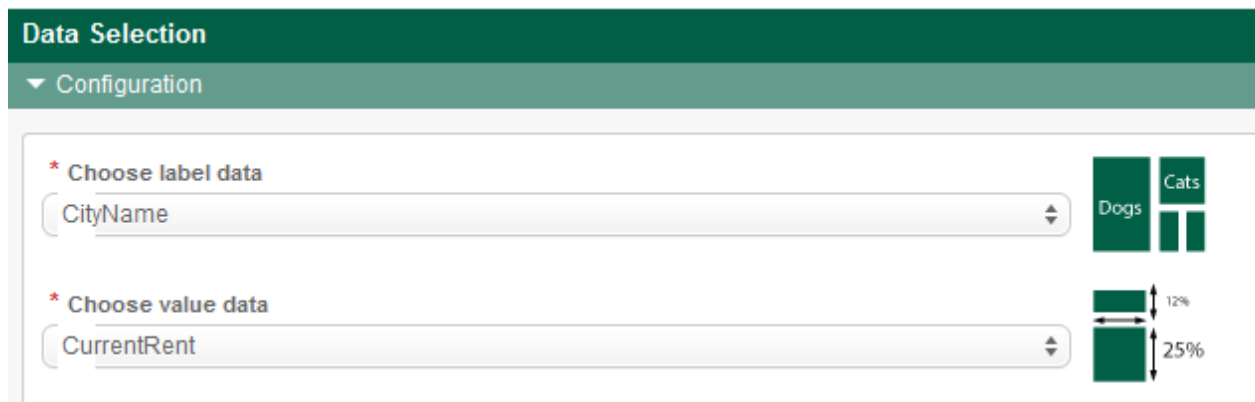

Select a Tree Map Chart:

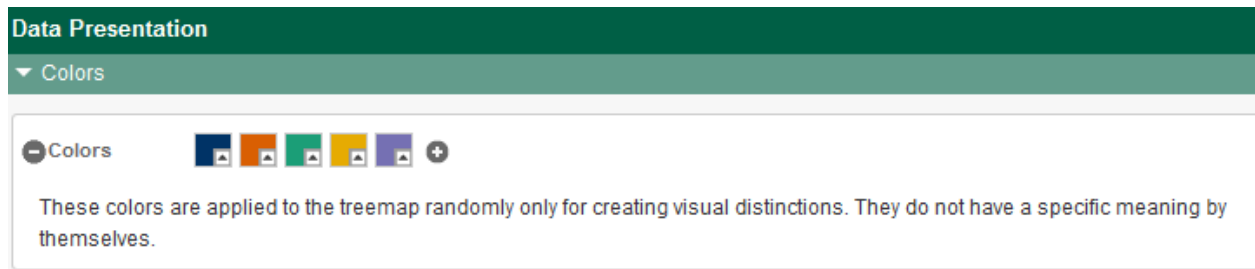

The options for this chart type are

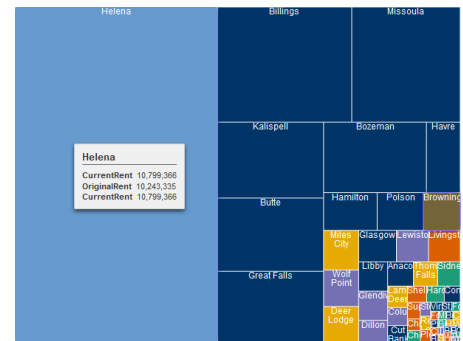

Under Data Selection Configuration, Choose the label, and the value field of the data. (For this example, we selected city name and current rent).

Under the Data Presentation Colors Selection, Options to change the color are available

Under the Chart Details Flyout Details Selection, Select which data points will display when you click on the data point.

Save your view if it is an existing view or select save as to create a new chart view.
